

## 4 100GE multimode optical modules

The Cisco 100GBASE-SL4 Short Link QSFP Module supports link lengths of up to 20m over OM3 and 30m over OM4 Multimode Fiber with MPO connectors. It primarily enables high ...

Supporting 100m over OM4 multimode fiber at 850nm wavelength, this module operates at 40G, 100G, and 112 Gbps rates with 1.9 dB link budget. MTP/MPO ...

Supporting 100m over OM4 multimode fiber at 850nm wavelength, this module operates at 40G, 100G, and 112 Gbps rates with 1.9 dB link budget. MTP/MPO connector enables seamless migration ...

The QSFP-10000-SR4 is a parallel 100Gb/s Quad Small Form-factor Pluggable (QSFP28) optical module. It provides increased port density and total system cost savings.

The 100GBASE-SR4 QSFP28 Optical Transceiver Module is designed for use in 100GBASE Ethernet throughput up to 70m over OM3 and 100m over OM4 multimode fiber (MMF) using a wavelength of ...

This transceiver is a high-performance module for short-range multi-lane data communication and interconnect applications. It integrates four data lanes in each direction with 100Gbps bandwidth. ...

Supporting QSFP+, QSFP28 and QSFP-DD optical modules with breakout capabilities on Nokia platforms, the modular solution offers operators the flexibility to mix and match connector breakout ...

QSFP28 transceiver that supports 100G connections up to 100 m using multi-mode fiber with an MPO-12 Type B UPC connector.

The series uses 4 pairs of parallel multimode fiber optics for transmission with a center wavelength of 850nm and distances up to 70m (OM3) or 100m (OM4) with optional industrial grade operating ...

Optical Module 100G SWDM4 Multi-Mode delivers high-speed 100GE connections with low power, LC interface, and DDM support.

This transceiver is a high-performance module for short-range multi-lane data communication and interconnect applications. It integrates four data lanes in each direction with 100Gbps bandwidth.
