

72-core optical fiber cable 12-core ribbon

The construction features the use of dry water blocking elements and reduced diameter buffer tubes, yielding a light weight, smaller cable. The result is a fiber optic cable that is an ideal transmission ...

The 72-count ribbon fiber cable is perfect for high-capacity network backbones, enabling easier mass fusion splicing and faster deployment. Ribbon fiber cable is designed for high-density fiber optic ...

GYTA53 fiber cable consists of 250um fibers held in gel-filled PBT loose tubes, and wrapped around a phosphatized steel wire central strength member. A waterproof compound fills the loose tube, and ...

We make it easy to get a quote on our 72-strand fiber optic cable.

Ideal for heavy traffic or more challenging mechanical exposure conditions, this cable design consists of fibers organized into 12-fiber ribbons inside a central tube surrounded by dielectric ...

The multi loose tube cable construction consists of up to 72, 250µm optical fibers in 12 fiber gel filled loose tubes with fillers where appropriate, SZ stranded around a fiber reinforced plastic (FRP) central ...

Compact design Has smaller diameter and bend radius than non-ribbonized loose tube cables; easier to install

These cables consist of 12 to 216 fibers organized into 12-fiber ribbons inside a central tube. Dielectric strength members provide tensile strength while a specially formulated flame-retardant outer jacket ...

This indoor/outdoor cable has a water blocking aramid yarn strength member surrounding the fiber optic strands and a UV resistant outer jacket making it a very versatile and perfect choice for a large ...

72-core optical fiber cable 12-core ribbon
