

Activity Outlet Optical Cable

Pivotal Optics" Active Optical Cables (AOCs) are fully integrated, plug-and-play fiber assemblies designed for short- to medium-range high-speed data links--without the need for separate transceivers.

AOC active optical cable can handle lots of data. It also cuts down on signal loss or interference. This makes it great for fast networks and big data centers. You can plug in an aoc ...

An Active Optical Cable (AOC) is a type of optical cable used for high-speed data transmission. It consists of an optical fiber that carries the data signal, and active components (such as transceivers) ...

Buy high quality active optical cables (AOC) for HDMI, USB, DisplayPort and DVI from ActiveOpticalCables with worldwide shipping.

Learn all about AOC cables, including their uses in data centers, electrical-to-optical conversion, and differences from traditional copper cables.

Learn why active optical cables support high speed networking and data centers with extended reach, low signal loss, and reliable high bandwidth connectivity.

These fiber optic AOC cables offer speeds of 10 to 100 Gbps and allow AOCs to transmit data faster than possible with traditional copper connections while still adhering to industry-standard electrical ...

Designed for a reliable connection between AV components and data devices at home, business or professional facilities, Luma active optical cables are designed with a strong, cast aluminum ...

Find reliable Toslink fiber optic cables for your home audio setup. Available in multiple lengths with corrosion-resistant connectors.

Active Optical Cables are perfect for AV applications like this because they are thinner, lighter and more flexible than copper cable, and they remove extenders and similar devices from the AV system.
