

Anti-Static Surface Mounting in Hot Aisles of Indian Data Centers

Controlling static in data centers is crucial for maintaining the reliability and longevity of critical electronic equipment. Let's examine the reasons why static poses a problem in data centers ...

The strips dissipate static electricity buildup and prevent static discharge to prevent damage to server components. Your strip curtain will be made to the exact size you specify - just select the width and ...

Whether you're building a new data center, upgrading an existing facility, or managing a colocation space, anti-static raised floor panels deliver benefits that traditional flooring cannot match.

Our modular systems provide flexible, secure separation between hot and cold aisles or controlled zones to maintain optimal environmental performance.

This is achieved by our completely tool-less design, resulting in an easy-to-install solution that is affordable enough to be scaled across multiple rows and can be applied to either hot or cold aisles, ...

Learn about the importance of hot aisle containment in data centers, with practical tips for technicians to enhance cooling efficiency and prevent equipment overheating

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly -- and make your build-out be more efficient, too.

Whether you're building a new data center, upgrading an existing facility, or managing a colocation space, anti-static raised floor panels deliver ...

Unlike cold aisles, which typically require raised floors (or overhead supply ducts), hot aisle containment can be used with or without a raised floor. The three most common configurations ...

Modular design allows you to quickly reconfigure your hot aisle/cold aisle data center containment system for expansion or a change in footprint. Works with booth hardwall partitions and softwall ...

Experience the next level of data center efficiency with Legrand hot aisle containment solution, designed to optimize airflow, reduce energy consumption, and ensure peak performance of your critical ...

The strips dissipate static electricity buildup and prevent static discharge to ...
