

Are color steel cable trays fireproof

Each tray is coated with a specialized fire-resistant powder, ensuring protection and resilience, designed to withstand extreme conditions, the trays offer reliable performance.

Choose appropriate fire protection materials, such as fire-rated board, firestop packs, firestop mastic, or fire-resistant mineral wool. Firestop packs should be placed in an orderly sequence.

The fire resistance performance of the inorganic fireproof trough box has been tested for 60 minutes by the fixed fire resistance inspection institute, and the cable has no damage.

Only use fireproof trays for flame containment or isolation, not for unrelated functions. Do not modify or damage the tray coating or structure during use.

Cable trays are intended for the construction of fire-resistant cable paths with surface cable laying. Cable paths are constructed as standard or lightweight cable paths.

Unlike standard cable trays, these systems are made from materials that can withstand high temperatures and are often coated or treated to slow the spread of flames.

Fire-resistant cable tray and conduit assemblies are designed to withstand extreme temperatures, preventing the spread of fire and ensuring the continued operation of critical equipment.

Choose appropriate fire protection materials, such as fire-rated board, firestop packs, firestop mastic, or fire-resistant mineral wool. Firestop packs ...

Hot-dip galvanized steel trays are coated with a layer of zinc to protect against corrosion, but they offer limited fire resistance. Zinc melts at relatively low temperatures, which means that ...

Meka Pro regularly tests the fire resistance of its products to ensure high-quality and safe cable management systems. The products are tested extensively and using several different installation ...

There are several material choices available for cable trays in today's market, the most popular choices are steel (HDG/SS), aluminum, PVC and FRP/GRP. However, there is not a ...
