

# Bare Fiber Optic Cold Connector

Product Summary: 5pcs L925B Fiber Optical Cold Fast Splicer Connector Bare Fiber Tail Fiber Rapid Connection

The product provides a simple and easy method to quickly interconnect any standard fiber connector to a piece of unterminated (bare) fiber to meet service, test or communication requirements.

ZGT provide SC and SC/APC fast field assembly connectors, for 3.0mm round cable and 2.0\*3.0mm flat cable. The monthly production capacity is 500k pcs, mainly used in FTTH, FTTX and Outside Plant.

It allows for fast and reliable fiber optic connections in various applications, such as telecommunications, data centers, and fiber-to-the-home (FTTH) installations. ...

The Quick Connect Fiber Optical Cold Fast Splicer Connector is designed for rapid, reliable fiber termination without the need for epoxy, polishing, or specialized splicing equipment.

Bare Fiber Adapters Features: o Easy to use o Low cost o Reusable and easy to clean o Magnetic clamp applies no stress to the fiber o Compatible with PM fiber (magnetic clamp version only) o Variety of ...

A fiber fast connector, also known as a mechanical splice or cold connector, is a field-installable connector that terminates fiber optic cables without requiring a fusion splicer.

Widely applied in FTTH, FTTx, LAN, and telecom networks, this cold fast splicer connector is perfect for emergency repairs, field terminations, and both temporary and permanent fiber links.
