

Carrier Backbone Network Optical Electronic Hybrid Cable DML

Purpose-built to fit sites of all sizes and types with support for passive optical networks (PONs), TDM, Ethernet, multi-protocol label switching (MPLS), IP, and virtual network services. Providing efficient ...

Next to many fiber optic, power, data and jumper cables for mobile networks, Fiber to the Antenna (FttA) and other applications, we offer different hybrid solutions ...

DuetConnect Hybrid Copper-Fiber Cables allow one cable to offer the advantages of DC power and fiber, safely delivering both over long distances to remote locations where standard power is ...

For computer room first level backbone usage, factory pre-terminated cables with MPO connectors are required. Fiber will be field terminated (fusion spliced) when used to connect the computer room to ...

Our global fiber backbone and dedicated network solutions help you optimize your IT infrastructure, reduce cost and increase business agility. Dedicated, high volume data transport with DWDM ...

CommScope bundles hybrid cabling to your custom specifications, using our high-performance fiber-optic, unshielded twisted pair and coaxial cables.

Modernizing both metro and backbone will enable carriers to deliver a high-performance experience to all of their clients while improving internal total cost of ownership.

Using hot-swappable optical modules such as SFP+ and QSFP series, operators can expand network bandwidth without major infrastructure changes. By leveraging CWDM or DWDM ...

This helps achieve remote coverage and ubiquitous connections, bridge the digital divide, and provide basic network connections for various industries. This solution is applicable to national, state, and ...

A suite of carrier-grade modular platforms that support a wide range of services and traffic management features, coupled with the latest generation of efficient, high-capacity coherent optical engines.

Just as Cables Unlimited has the ability to provide fully integrated custom rack and stack data centers, we can also pre-wire and terminate the hybrid cables now being used in 4G, WiMAX, LTE type ...
