

In optical transmission network fiber-core management scenarios, China Unicom implements unique digital identifiers for each fiber strand. This breakthrough ...

In 2014, China Unicom took the lead in launching the exploration of new types of optical fibre in the global industry, and promoted and participated in setting the ITU-T G.654E optical cable ...

The first commercial circuit of China Unicom's China-Myanmar cross-border optical cable system project (CMI project), PCCW 2M, has been completed and put into operation, marking the ...

Metallic optical cable labels are the preferred choice for telecom operators like china mobile, china unicom, and china broadcasting network when it comes to tagging and identifying ...

The first commercial circuit of China Unicom's China-Myanmar cross-border optical cable system project (CMI project), PCCW 2M, has been ...

This marks a significant breakthrough for China Unicom in the innovation of cutting-edge optical communication technology and the construction of next-generation communication infrastructure.

They mark a significant milestone for the hollow-core fibre and transmission system industry, transitioning from a technology prototype to industrialization. Moreover, they underscore ...

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will ...

This live network validation nearly doubled the transmission distance, marking another innovative practice by China Unicom in ultra-high-speed transmission network technology, with significant ...

In optical transmission network fiber-core management scenarios, China Unicom implements unique digital identifiers for each fiber strand. This breakthrough approach converts "dumb resources" into ...

Together, we have successfully deployed and launched China Unicom's first commercial hollow-core fiber optic cable line -- a major step forward in next-generation optical communication.

December 23, 2024 - With the successful completion of the Asia Direct Cable (ADC) project, co-built by China Unicom, the company has achieved a groundbreaking milestone in global ...

China Unicom Optical Cable Marking
