This hands-on course covers the concepts and characteristics of various protection schemes used for high voltage transmission lines and relays.

This training is designed for electrical engineers, system operators, and protection specialists seeking to enhance their skills in designing and implementing effective protection systems.

Our hands-on training courses are designed to provide electrical technicians with the specialized skills required to test, calibrate, and maintain both mechanical and microprocessor-based relays with ...

Participants are introduced to modern digital protective relays used in North America and learn how relay software, communications, and testing fit into everyday engineering and maintenance workflows.

This course covers basic relay operating principles for various types of protective relays providing workers great insight to the importance of relaying for system protection.

Our protective relay training program is fully customizable and can be built to suit substation relay technicians at any stage of their career. With the proper training, you increase efficiency and ...

Join 50Hz Academia's Power System Protection Course & Relay Coordination to master fault analysis, protection schemes, and relay setting techniques based on ...

PROT 401 provides an overview of the principles and schemes for protecting power lines, transformers, buses, generators, and motors. The course provides basic guidelines for relay application and ...

Join 50Hz Academia's Power System Protection Course & Relay Coordination to master fault analysis, protection schemes, and relay setting techniques based on IEC & IEEE standards.

The Hands-On Relay School is a professional development short course that trains protective relay technicians, electrical/power plant technicians, engineers, and protective relay test specialists.
