Consulting about IP67 in the cold aisle of the computer room

Not every type of consulting pays the same. See the 25 types ranked by fee ceiling and AI resilience, with proof from established consultants.

Standard IP testing is performed using fresh water; protection against other fluids, such as salt water, oils, or solvents, is not guaranteed by the rating and requires specific chemical resistance testing.

The sealed IP67 design protects the internal components from dust and water. Each computer utilizes a fanless cooling system and industrial-grade components capable of withstanding shocks and vibrations.

IP67-rated enclosures are more than metal shells; they are insurance against interruptions. By blocking contaminants from reaching lenses, connectors, and analog front ends, IP67 helps ensure that AI ...
