

DIY cable tray horizontal tee

Discover our Horizontal Tees for cable tray systems. Contact us today for availabilities and receive a quote. Fast shipping for just in time delivery!

Powder coated tray requires the removal of the coating in the clamping area in order to create a bond. Cable tray should be bonded to the building or facility grounding system every 50" - 60".

Refer to the images below to determine how many tray sections will be required to be cut from the tray for the corner splice. Ensure that the side wire cuts and the mid-section cuts are always symmetric.

Optional removable cable outlet kits offer flexibility. The transitions are with build-in connectors, which makes assembly and installation fast and easy. Our trays feature a brand-new mold design, ensuring ...
