He is correct, that is because that was the only size engine VW made in Mex. for air cooled cars and buses, VW did not make engines in Mex. when the 36-40 HP were being made ...

Most of the engine is identical to the air-cooled Beetles of the 70s, and repair procedures are similar. However the valves should not be adjusted periodically, and are set like the T4 hydraulic lifters (0 ...

While the Mexican domestic climate may not see the extremes of other world areas, these system considerations probably had more influence on the decision to drop the thermostat than the climate.
