

Distribution Box Temperature Limiter

Our own plant produces high quality, customized temperature limiters; the functionality of every single switch is multiple tested and thus 100% reliability is guaranteed.

Multi-point temperature detection installed on the distribution cabinet; Various installation structures and sizes are available; Strong moisture resistance, high stability, high pressure resistance.

The wireless temperature sensors can be installed at any heating point in switchgears, the device utilizes the wireless data transmission technology for real-time transmission of monitored ...

The Series TSF Thermocouple Limit Control offers reliable temperature management for gas ovens and burners, featuring an alarm, relay output, and easy reset options.

R. STAHL's temperature sensors and temperature limiters shut down systems if the temperature is too high or too low. The robust thermal cut-outs are suitable for Zones 1, 2, 21 and 22 and help maintain ...

Multi-point temperature detection installed on the distribution cabinet; Various installation structures and sizes are available; Strong moisture resistance, high ...

A simple open loop cooling system filters incoming air, but will not be able to lower the air temperature below ambient temperature. This provides an inexpensive cooling solution for light heat loads.

The use of limit devices provides vital protection for temperature controlled process systems and where necessary the safety of both the workforce and the plant itself.

The Ex-Box LIM/DIS is a limiter for switching off heating circuits in case of excess temperature or current overload. Furthermore, output signal values for maximum and minimum temperatures are ...

The wireless temperature sensors can be installed at any heating point in switchgears, the device utilizes the wireless data transmission technology for real ...

Turn heating equipment on or off at a specified temperature. Precisely regulate process temperatures; more accurate than temperature switches. Use as a safety switch to shut off hydraulic equipment and ...

The LIMIT protects expensive heaters and sensitive materials from damaging over temperature conditions. It is designed for industrial and commercial applications that require high temperature ...
