

Earthquake-resistant cable tray support factory

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.

The assembly connects the structure such as a beam or ceiling, to a brace member which could be cable, channel, or pipe to a non-structural support, such as pipe, trapeze, cable tray, duct, and more.

We possess over 60 pieces of heavy machinery to fully support the production and processing of various products, including unique customized products tailored to ...

Selecting the right earthquake resistant cable tray is critical for safety and compliance. A methodical evaluation ensures your system can withstand seismic events.

Cable trays are systems used for the safe transportation and protection of electrical cables, designed to fit the pathways within buildings and structural installations.

We possess over 60 pieces of heavy machinery to fully support the production and processing of various products, including unique customized products tailored to any specialized requirements.

Learn how I approach Cable Trays Seismic Design to protect power and data in earthquake-prone areas. Understand key principles, methods, and applications.

This article discusses the importance of seismic resistance for cable trays, detailing when seismic braces are necessary, the factors that affect seismic resistance, and how to ensure your ...

Explore the essential guidelines for seismic support in electrical installations, focusing on cable trays and their critical role in ensuring system safety during earthquakes.

Seismic bracing adopts modular components, allowing for prefabricated construction without the need for welding or drilling. This construction method facilitates easy disassembly and modification, and is ...

Our team of experts can help you select the best cable tray series for your application, as well as designing your seismic bracing layout to ensure it meets applicable building codes and standards.
