Question: 50 Volts on One Buss and 190 on The other.
Question: A 8 Space 16 Circuit Panel and A 16 Space 16 Circuit Panel?
(June 1, 2014) Anonymous said: I had 225 volts on a 15 amp. The last thing I tried was a 15 amp electric heater. That gave me 50 volts on one buss and 190 on the other. This is a sub panel but I have replaced the 100 amp in the main just in case. I am checking voltage from each of the buss to the common buss. See more on inspectapedia
