

Energy-efficient lightweight high-strength cable trays

Perfect for cable management, our GRP cable trays offer lightweight, corrosion-resistant support for cables in industrial, infrastructure, and renewable energy projects.

The aluminum cable tray is a lightweight, durable, and cost-effective solution used for organizing and safely carrying electrical and data cables. With easy installation and strong corrosion resistance, it is ...

Our Wire Mesh Tray creates a dedicated pathway for all low-voltage and data cables. It is constructed of precision-engineered, high-quality welded steel wire and is the result of decades of ...

The lightweight energy-saving cable tray features advanced structural designs such as corrugated bases and reinforced stamped bottoms. These enhance load-bearing strength while reducing material ...

Wire mesh cable trays--often called basket trays --are constructed from welded steel wire, forming a lightweight open-grid structure. Unlike traditional formed trays, wire mesh trays rely ...

Over the past 55+ years, MP Husky US Cable Tray has engineered and manufactured the most reliable, highest quality, cost effective and innovative cable trays systems available.

FRP Cable Trays are durable and lightweight cable management solutions made from fiber-reinforced plastic. They securely route electrical and communication cables while offering superior resistance to ...

Tripp Lite's wire mesh Cable Tray System accommodates copper network cables, A/V cables and lightweight cables/cable bundles to reduce cable clutter in data centers, server rooms and other IT ...

Energy saving molded cable trays are designed to reduce energy consumption and resource waste through structural optimization and functional design. They utilize a mold-press forming process, ...

Ectray cable trays and cable ladders provide high-strength cable protection that protects the cables from external factors. Support systems can be manufactured with thicknesses from 2mm to 6mm with Pre ...
