It brings together fiber splicing, patching, and cable routing in a single structure, while shielding sensitive connectors and splices from mechanical stress or contamination.

Adjustable 19" mounting rails at the rear of the rack provide excellent front access to all cables and the optional PMF rack provides fast and easy cable overlength management.

The Corning® Optical Distribution Frame is optimized for high-density cross-connect applications.

It brings together fiber splicing, patching, and cable routing in a single structure, while shielding sensitive connectors and splices from mechanical stress ...

Support structures for fiber optic cable installations should be completed before the installation of the fiber optic cable itself. Outside plant structures should be installed in conformance with all permits ...

Below is given the fiber optic cable installation method statement for performing the installation of optical fiber cabling system for any kind and size of project.

The 600mm wide frame can be configured with vertical cable managers (VCMs) and accessories to offer various frame arrangements that meet multi-application needs.
