

Fiber Optic Switch S3000

Switch is web managed. Attention! The SFP port requires the SFP module, which is available in our offer.

The S3000 Series are robust, fully managed Layer 2/3 industrial Gigabit switches. Designed for harsh environments, they offer PoE/PoE+, wide temperature operation, and redundant power for reliable ...

The HODONET S3000-8M4XF-PoE+ is an advanced PoE managed switch designed for high-bandwidth, high-power device access scenarios. It features 8 x 2.5G Base-T PoE+ ports compliant ...

The S3000 Series are robust, fully managed Layer 2/3 industrial Gigabit switches. ...

S3000-P Series is a smart PoE switch independently designed by company. Featured with 8/16/24 IEEE. 802.3at/af-compliant RJ45 ports, it supplies a maximum PoE power output of ...

Optical Switches We lead the industry in optical switch technology, delivering the lowest insertion loss (0.2 dB), fastest switching speed (10 ns), broadest wavelength range (300-2400 nm), widest fiber ...

Features 16*100Mbps SFP fiber ports and 2*1000Mbps Combo ports IEEE802.3, IEEE802.3u, IEEE802.3ab/z and IEEE802.3X standards Support WEB, SNMP (v1/v2c), link aggregation Port ...

It features 8 full-duplex 10G SFP+ fiber ports (backward compatible with 1G modules), creating a pure, high-speed, and interference-resistant optical network environment.

3000 Fiber Optic Illuminator using the overall heat sink, high brightness LED and a unique condenser system to achieve high power output under the high brightness and long life.

Within a palm-sized chassis, it converges 8x RJ45 ports supporting 2.5G speeds and PoE++ power delivery, along with 2x 10G SFP+ fiber uplink ports, providing powerful connectivity and expansion ...

Fiber Optic Switch S3000
