Dietary fiber is material from plant cells that cannot be broken down by enzymes in the human digestive tract. There are two important types of fiber: water-soluble and water insoluble.

The recommended amount of fiber is 21-25 grams per day for women and 30-38 grams per day for men (at least 14 grams for every 1000 calories). Increase fiber in your diet slowly to avoid side effects.

We develop custom fiber optic solutions based on your specific requirements. From specialized housing designs to custom connectors and individual capacities - we'll find the optimal solution for your project.
