

Follow-up to the incident where a pedestrian fell into a fiber optic cable well

A San Antonio woman died Thursday, almost two weeks after suffering serious injuries from a toppled fiber optic line that hit her while she was doing yard work at her Northeast Side home.

The employee was operating a bucket truck next to the powerline to retrieve the fiber optic cable. While attempting to remove the cable from the powerline, the employee contacted the high voltage line with ...

The old story about the most likely fiber optic communications system failure being caused by "backhoe fade" is not a joke - it happens every day. But it reminds us that digging safely is vitally important.

A fiber optic installation worker fell into a collapsed trench, according to a news release from Assistant Chief of Training and Public Information Officer ...

Not only can particles from your lunch break contaminate your work, fragments of fiber are impossible to see but easy to ingest if they fall into your food -- which could lead to internal ...

A fiber optic installation worker fell into a collapsed trench, according to a news release from Assistant Chief of Training and Public Information Officer Scott Schaunaman.

There are a lot more than five essential safety measures that people should actively leverage when working with fiber optic ...

There are a lot more than five essential safety measures that people should actively leverage when working with fiber optic cables. Still, we don't have time to delve into all of them with ...

The document is an incident investigation report from Kuwait Oil Company regarding an asset damage incident that occurred on February 17, 2022 during landscaping ...

The family of a Texas woman who died in May after a low-hanging fiber optic line struck her in the head is suing AT& T and its cable maintenance contractor, claiming that the cable hung below ...

The document is an incident investigation report from Kuwait Oil Company regarding an asset damage incident that occurred on February 17, 2022 during landscaping work.

Supervisor and employees will not inspect live fiber optic cable ends (live fibers are those with signals being sent through the cable). Fibers will be dark (no signals being sent through them) when inspected.

Follow-up to the incident where a pedestrian fell into a fiber optic cable well

Authorities said workers installing fiber optic cable called for help after realizing they hadn't noticed a co-worker for some time. They also found that the excavator he operated was not ...
