

Has the national rollout of intelligent distribution boxes been implemented

This article explores the latest innovations in Distribution Boxes, focusing on smart monitoring and remote maintenance capabilities that are redefining power distribution management.

Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. Those ...

The solution has revolutionised the management of over 100,000 distribution transformer districts, reducing outage durations and achieving an impressive power supply reliability rate.

Integrated distribution boxes are becoming essential components in modern electrical and automation systems. They serve as centralized hubs, combining multiple functions such as power...

This Article reports the findings of a new hospital system program designed to distribute Naloxone using newspaper-style Naloxone distribution boxes in an underserved community compared to distribution ...

This project offers a novel, low-barrier model for naloxone distribution through publicly accessible boxes, addressing persistent challenges in take-home naloxone uptake and potentially ...

City Power Embarks on Rollout of Intelligent Distribution System to Curb Energy Losses and Modernise Operations

The zone controller is responsible for the intelligent distribution of energy and data within a specific zone of the zonal architecture. Both the development and the provision of the product for customers are ...

Consumers can better manage their own energy consumption and costs because they have easier access to their own data. Utilities also benefit from a modernized grid, including improved security, ...

NLR is supporting the effort led by Pacific Northwest National Laboratory to build an open-source platform, GridAPPS-D, that accelerates development and deployment of portable applications for ...

NLR is supporting the effort led by Pacific Northwest National Laboratory to build an open-source platform, GridAPPS-D, that accelerates development and ...
