

High-density hot-swappable power distribution unit intelligent type in stock

Take energy management to the next level with Panduit PDUs. Designed to protect both on-premises and remote environments, our PDUs not only optimize power consumption but also guarantee ...

The PX4 is more than just a rack power distribution unit. It is a unified rack PDU solution that provides forward-thinking tools, sensors, and insights to solve ever-evolving infrastructure challenges.

With options designed for high-density environments, our PDUs are built to support the increasing power demands of cutting-edge technologies, including AI, machine learning, and big data analytics.

High availability for all UPSs up to 11 kVA. HotSwap MBP provides a maintenance bypass for all UPSs. UPSs can be hot swapped or upgraded without interrupting the power supply. HotSwap MBP are ...

ArcTiv iPDU"s reliably power your IT racks and cabinets with high density modular designs in both metered and managed configurations.

The SOETECK Precision Power Distribution Cabinet with Hot-Swappable Design offers a comprehensive power management solution that supports stable and efficient electrical distribution ...

Monitor and measure critical power quality factors, such as voltage, current and power consumption. This rack mounted PDU helps conserve energy with Level 3 power usage effectiveness, ideal for ...

Built with high-temperature grade premium components to withstand 60°C high temperature at full load for an extended period to provide high quality and reliability

Designed for modern high-density systems, hot-swap controllers can support higher current and power levels than typical eFuses, making them ideal for high-density, high-performance systems.

The iX Controller is fully hot-swappable and the center of intelligence in the new Server Technology PRO4X generation of rack PDUs. It offers industrial-grade reliability, user-configurable firmware, and ...
