

# High-resolution optical analyzer

The WaveAnalyzer™ 1500S Optical Spectrum Analyzer is a real-time, very-high-resolution optical spectrum analyzer for R& D and production test applications.

XSoptix offers the following Optical Spectrum Analyzers from Yokogawa, Zepren, ID Photonics and Coherent Yokogawa family of OSAs including Visible, Wide and Long wavelength options

Anritsu offers high-speed spectrum analyzers for optical device evaluation to measure a wide range of optical systems fast and accurately. The benchtop Optical Spectrum Analyzer MS9740B features ...

With up to 500 times better resolution than the best standard grating-based Optical Spectrum Analyzer on the market, our new generation of Optical Spectrum Analyzers can display your signal's real ...

Accurate measurement of optical spectrum without artifacts: good dynamic range, high optical throughput, high spectral resolution and high wavelength accuracy. The OSA has been designed ...

Coherent's WaveAnalyzer(TM) 200A is a high-resolution, high-sensitivity optical spectrum analyzer (OSA) designed for both advanced optical transmission research and production line testing.

Our user-friendly tools offer a comprehensive analysis of optical signals in the C- or L-Bands with a host of features like auto-ranging. With no specs compromising, all WaveAnalyzers can deliver their ...

VIAVI has developed an industry-leading portfolio of optical spectrum analysis test solutions for lab, field, and manufacturing applications.

Advanced optical spectral analysis enables precise performance characterization across diverse sectors, including telecommunications, consumer electronics, healthcare, life sciences, security, ...

Discover BOSA, the pinnacle of High Resolution Optical Spectrum Analyzers. Unmatched in performance for O, S, C, & L bands. Reliable, artifact-free measurements. Explore now!
