

Home Broadband Aggregation Switch

An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network.

WISI's innovative Novalink Outdoor Aggregation Switch is meticulously crafted to cater to the needs of network providers leveraging 1G/10G/25G and 100G interfaces for seamless interconnection and ...

Equipped with future-proof fiber-optic and multi-Gigabit Ethernet (mGbE) ports as well as high-throughput uplink and stacking ports, they form the basis for efficient and fail-safe networks. Stacking ...

Provides advanced Security ACLs for improved security, traffic control, and QoS, ensuring efficient and optimized networking.

Experience the power of link aggregation with versatile managed switches. Explore options with web-based management, VLAN support, and energy-efficient designs.

Discover the crucial differences between core, aggregation, and access switches. Find out which type can best transform your network's performance in 2025.

Discover the role of aggregation switches. Explore differences between aggregation, access, and core switches, and choose the right model for your network.

Unlike an access switch that connects end devices like PCs, access points and cameras, an aggregation switch is designed to connect other switches together, creating an ultra-fast data core ...

Link aggregation combines multiple interfaces into one, making data transfers smoother and networks more reliable. It balances loads across ports, improving speed without adding complexity.

For this reason, we've delivered a data center-influenced standalone OLT architecture paired with non-blocking leaf-spine fabric and aggregation switching. A key characteristic of these leaf-spine ...
