

# Hot-swappable power distribution units cold aisle desktop manufacturers

While hot aisle and cold aisle containment systems both are capable of increasing efficiency and cooling today's high heat data centers, cold aisle containment better addresses the task of separating hot ...

Discover CHx2000, CoolIT's highest-performing CDU. 2000 kW liquid-to-air capacity, hot-swappable pumps, and full monitoring for data centers.

Discover how hot and cold aisle containment improves cooling efficiency, cuts energy costs, and supports uptime in modern data centres.

o High-efficiency integrated power distribution and closed cold and hot aisles, leading in power density and energy efficiency in the industry. o Supports various configurations of single-row or double-row ...

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...

Supermicro's in-house developed in-rack or in-row CDU features 1+1 redundant hot-swappable pumps that circulate coolant to cold plates, removing heat from CPUs, GPUs, and DIMMs. CDUs provide ...

Effective aisle containment is critical to maintaining peak data center cooling efficiency. By creating a physical barrier between cold supply air and hot exhaust air, containment solutions prevent airflow ...

Whether ceiling hung or integrated with aisle structure, our containment solutions are manufactured on our dedicated lines for quality, accountability, and fast lead-times.

Cool Shield(TM) containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

SmartOnline hot-swappable modular UPS systems feature a modular power distribution unit (PDU) that combines all input and output power connections with a manual bypass switch.
