

How to view the MAC addresses of VLANs connected to a switch

This guide provides a comprehensive overview of commands to check switch health, interface status, VLAN configurations, MAC address tables, port security, and spanning tree protocol ...

The MAC address assigned to each switch port is used internally by such features as Flow Control and the spanning-tree protocol. Using the walkmib command to determine the MAC address assignments ...

You can check the MAC addresses stored by a Cisco switch by logging into the switch and issuing the command `show mac address-table`. The addresses are stored in a table called the ...

This table stores mappings between device MAC addresses and the port on the switch where the device is connected. When a switch receives a frame, it consults this table to decide ...

The mac address or CAM table shows the VLAN associated with the port, MAC being learned on the port (i.e. mac address of the connected device) and port number. Only ports which ...

In this article, we'll explore how this can be done on Cisco-based networks ranging from a single switch to a larger enterprise network with several switches. On another article we have explained how to ...

The address table lists the destination MAC address, the associated VLAN ID, and port number associated with the address and the type (static or dynamic). Layer 2 switching is based on hardware ...

This guide provides a comprehensive overview of commands to check switch health, interface status, VLAN configurations, MAC address tables, ...

Dynamic: Through a process known as MAC learning, in which the switch retrieves the source MAC address (and VLAN ID, if present) of each Ethernet packet received on a port, dynamic ...

Cisco switches support per-vlan mac-address tables. As posted by John you can show all the mac-addresses specific to a vlan and you can also clear all mac-addresses specific to a vlan.

We'll review the MAC address table on a Cisco switch to learn how a device to port mapping is created and why it is needed. We don't think much about connecting our hosts to a Cisco ...
