

Huijue RRU optical module

When an optical fiber connects a BBU3900/BBU3910/BBU5900 to an RRU, the breakout cables on the BBU side and on the RRU side are 0.34 m (1.12 ft) and 0.03 m (0.098 ft),

The optical module implements optical-electrical conversion, thus enabling optical transmission between the RRU and other devices. You need to remove the optical cable before replacing the optical module.

Key attributes Use Campus Type Enterprise Switch Model Number 10G Gigabit Single-Fiber BBU, RRU Optical Module Brand Name HW Place of Origin Hubei, China Part Number 03034HXL Model ...

RRU5935E RRUs include RRU5935E with external antennas and RRU5935E with internal antennas. The following figure shows an RRU.

Optical Module Type Optical modules can be divided into single- and multimode optical modules, which can be distinguished as follows: o The puller of a single-mode optical module is blue and the puller of ...

It presents the exterior and describes the ports, functions, cable types, connector specifications, and cable connections of the RRU. The following table lists the product versions related to the RRU3959. ...

A CPRI fiber optic cable must be connected to optical modules in the CPRI ports. A multi-mode fiber optic cable and single-mode fiber optic cable are connected to multi-mode optical modules and ...

SFP BIDI optical modules are used on both sides, or the DSFP optical module is used on the BBU side and the SFP BIDI optical module is used on the RRU side. The receive and transmit wavelengths of ...

Optical Module Label label is available on each optical module, which provides information such as rate, wavelength, and transmission mode, as shown in the following figure.

Do you accept small orders for wholesale? Acceptable. Optical components can even be ordered as one piece.

Huijue RRU optical module
