

Huijue Server AI

Founded in 2002, Huijue Group is a high-tech service provider integrating the integration and application of intelligent network equipment and intelligent energy storage equipment.

The EU's recent AI Act mandates energy transparency, pushing developers to report CO2 per 1,000 inferences. Meanwhile, China's "East Data West Computing" project redirects AI workloads to ...

Its proprietary self-developed automatic or semi-automatic production and testing equipment fully guarantees the stability and consistency of devices.

Huijue Net integrates prefabricated buildings and intelligent modular data center technologies. Integrating intelligent temperature control, power supply, lithium battery and AI technology

Through precise data analysis and intelligent algorithm optimization, Huijue's AI system can adjust equipment operating parameters in real time to minimize energy consumption.

With AI workloads causing 400% more power transients than traditional servers, the new generation of 10KVA UPS systems incorporates predictive failure analysis.

Huijue Networks is a high-tech service manufacturer integrating intelligent network communication equipment and an integrated application of computer intelligent network communication systems.

Founded in 2002, Huijue Network is a high-tech service provider integrating intelligent network communication equipment and computer intelligent network communication system integration and ...

Imagine this: Your data center suddenly loses power during a server migration. The backup generator takes 12 seconds to kick in - but your 2KVA UPS with LCD display shows a worrying voltage ...
