

Industrial Switch SFP

The IDS-409-SFP is a 9 port Managed Ethernet Switch that can operate in industrial environments providing advanced performance and enabling real-time deterministic network operation.

Industrial unmanaged switches from Phoenix Contact feature variable numbers of ports and a narrow design. We provide unmanaged switches with a variety of functions, depending on the application.

Learn about the different types of Small Form-factor Pluggable modules--or SFP for short--, how they're used in industrial network switches, and how to select an SFP transceiver for your application.

The 10 port industrial ethernet switch is adaptable to different network demands, supporting interchangeable SFPs for different fiber types, distances, and connectors, enabling customization ...

Our switches are built for high network flexibility, cyber security and durability and are suitable for use in mission-critical environments.

FS Industrial Ethernet Switches with robust design for harsh industrial and outdoor environments subject to vibrations, shocks and extreme temperature fluctuations from -40° to 75° generally.

Fully managed 8-port switch with dual SFP slots expands your Gigabit Ethernet network in harsh environments, including construction sites and factories.

Featuring a 10Gbps uplink, the IGS-1000-8T4X is suitable for connecting to an industrial backbone or high-capacity servers. Operating flawlessly across an extensive temperature range, it guarantees a ...

Built to endure the demanding conditions of factories, transportation infrastructure, grid substations, and other harsh environments, Cisco Industrial Ethernet switches come in a wide range of form factors to ...
