All product-related documents, such as certificates, declarations of conformity, etc., which were issued prior to the conversion under the name Pepperl+Fuchs GmbH or Pepperl+Fuchs AG, also apply to ...

Aerial & Direct Burial Fiber Optic Cable Enclosure with Fiber Splice Tray for Splicing with Fusion splicer with Fusion Splice Sleeves 60mm (Horizontal 48 Strand)

Prepared fiber ends are placed in the splicer and automatically aligned and then fused together. This method ensures greater reliability with less light being scattered or reflected back by the splice.

It can be used both to splice cables of desired length and to connect the cable in the field. Optimal joining results are therefore obtained, with reduced attenuation near the weld.
