

J599 Plastic Fiber Optic Connector

J599 MPO series fiber optic connector core number: 2~24 core, J599 shell, built-in standard MPO, high-density transmission, matching standard for 1U non-fusion optical distribution box, can be applied to ...

J599 Series Optical Connectors Introduction: Different shell materials and plating, applicable for different environments Five-key way orientation, blind mating, anti mis-mating function Tri-start ...

The J599 outdoor waterproof fiber optic connector features three threaded quick ...

Can be used for a variety of field military optical fiber communication networks, military computer systems, airborne or shipborne equipment, repair optical cable systems and other field light path ...

The J599 series represents the military-standard fiber optic connector family, designed for high-speed, EMI-immune data transmission in demanding aerospace, defense, and industrial applications.

The J599 series fiber optic connector (also known as the J599 III series circular fiber optic connector) is a multicore environmental resistant fiber optic connector developed on the basis of the J599 III series ...

The J599 outdoor waterproof fiber optic connector features three threaded quick connections and is designed with five keys for positioning, including blind-mating, anti-corrosion, and anti-vibration ...

Note: Any specific requirements, please ask for customization.

Adapter sockets (optional gas seal) are available, freeing from fiber optic cable constraints.

It inherits all the advantages of J599 series fiber optic connectors, such as environmental resistance, five key identification, three head thread locking, and connection anti-loosening.

Military-grade J599 Optical Connector for extreme environments. Features blind-mate design, vibration resistance, and low insertion loss. Ideal for aerospace and defense applications.

J599 Plastic Fiber Optic Connector
