

Exemption from VAT on imports into the territory of the Kyrgyz Republic of specialized goods and equipment intended for the construction of power plants using renewable energy sources (the list of ...

Guidelines and best practices for micro-, small and medium enterprises in the Kyrgyz Republic on delivering energy-efficient products and in providing renewable energy equipment

Kyrgyzstan's intelligent power module (IPM) market is growing, supported by the increasing demand for energy-efficient power electronics in applications such as industrial automation, renewable energy ...

During the research, the results of three-dimensional modeling of three types of hydraulic turbines using the Kompasflow software product and the results of experimental studies obtained on a...

With 300+ sunny days annually, Kyrgyzstan's solar potential remains largely untapped. The Osh standard photovoltaic modules offer a robust platform for both residential and commercial energy ...

HOME / SOLAR MODULE MANUFACTURING FOR KYRGYZSTAN'S Request Technical Proposal Call +48 22 555 1234

During the research, the results of three-dimensional modeling of three types of hydraulic turbines using the Kompasflow software product and the results ...

Discover the key technologies for manufacturing solar modules that thrive in Kyrgyzstan's high-altitude climate. A guide for long-term performance and ROI.

The micro-inverter market in Kyrgyzstan is growing as the adoption of solar energy systems increases. Micro-inverters, which convert the direct current (DC) produced by solar panels into alternating ...

Microdul is specialized in manufacturing high-quality, miniature electronic modules and in the processing of uncased integrated circuits.

The satellite carries a high-resolution optical payload and a custom-built communication module, enabling it to transmit data directly to ground stations within Kyrgyzstan.

Our smart micro inverters are fully programmable and compliant with international safety standards, ensuring seamless integration with the local 220V/380V AC grids found across Kyrgyzstan.

Kyrgyzstan Micro-module
