

# Lebanese Optical Separator 48-core

The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed.

**Gel-Filled and Dry Core:** Depending on your installation preferences, we provide both gel-filled and dry core cables to meet various environmental conditions and installation methods.

Optical beamsplitters are available in various designs such as plates, cubes and pentaprisms. Our selected suppliers can manufacture almost any design including coatings for light in the visible ...

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

A steel wire, sometimes sheathed with polyethylene (PE) for cable with high fiber count, locates in the center of core as a metallic strength member. Tubes (and fillers) are stranded around the strength ...

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

Search for and compare optical components from manufacturers around the world, or for custom jobs we'll match you with an industry expert service provider.

Shop or export authentic Lebanese products worldwide--fast and trusted.

Manufacturing high-performance optical filters covering a spectral range from 200-3000nm with superior durability and longevity. Offering off-the-shelf, custom, and high-volume production products and ...
