

Methods for parallel hanging of mobile communication optical cables

Cable stress relief and environmental sealing between the cables and splice, or the cables and the connectors, to prevent the entry of external contaminants and to provide protection from both cable ...

Mounting elements are used to attach or fasten other elements to cable supports and fittings. For example, a mounting plate is often used for junction boxes or device supports. The standard defines ...

Keep these cables separated from lightning protection circuits. If you install communications cables in a Chapter 3 raceway, you must do so in conformance with the NEC requirements for the raceway ...

There are two ways to lash cable to a messenger, the moving reel method and the stationary reel method. In the moving reel method, the reel is moved slowly under the route while the lasher is ...

There are two basic types of aerial lashing; moving reel method and stationary reel method.

This Applications Engineering Note (AE Note) addresses common issues regarding cable pay-off during outside plant installations known as cable squirting, cable tangling during payoff, and ...

It was suggested in 1966 that optical fibres might be the best choice for using laser light for optical communications, as they are capable of guiding the light in a manner similar to the guiding of ...

Next a crew comes to install the messenger strand. If the strand is in the power space, it must be bonded at every other pole. After the strand is installed, a separate crew comes back through with ...

USA and Canada have a long tradition of attaching cables to buildings or hanging them in existing masts. However, many supply companies have now seen the advantages of installing ducts ...

These cables carry phone, internet and fiber-optic lines that do not have sufficient strength to support themselves. Installers, therefore, first string a robust, galvanized steel messenger cable, and then run ...

Installation methods for both wire and optical fiber communications cables are similar. Fiber cable is designed to be pulled with much greater force than copper cable if pulled correctly, but excess stress ...

A cable block particularly adapted for use in the installation of aerial cable comprises a main frame member formed at its upper end with an inverted V-shaped strand engaging hanger section,...
