

# North Africa Temperature Measurement Optical Cable Factory

AP Sensing can monitor temperature under harsh conditions over long distances to optimize maintenance, detect fires and overheating, and measure environmental temperature.

Solexperts performs high precision temperature corrected fibre optic strain measurements and offers a complete service including: Installation on site (e.g. integrated into concrete structures, bonded to ...

Established in 2016, through the partnership of Yangtze Optical Fibre and Cable Joint Stock Limited Company (YOFC) and Mustek Limited (a JSE listed company), YOA Cables has already positioned ...

Since 1952, we've specialized in delivering top-quality measurement equipment, sensors, and custom control systems across industries. Our team provides unmatched support, from product selection to ...

The DTSX can provide uninterrupted, highly accurate measurements over long distances of up to 50 km using fiber optic cables, allowing real-time monitoring of temperature changes.

Established in 1994, Lambda's charter is to provide leading edge test and measurement solutions to the Southern African fibre optics and telecommunications industry at the best possible price/performance ...

High-definition temperature sensing based on the natural Rayleigh backscatter in optical fiber delivers a virtually continuous line of temperature measurements with sub-millimeter spatial resolution.
