

# North Korea's haphazardly strung fiber optic cables

Undersea cables serve as valuable but vulnerable assets in a nation's strategic placement in cyber and information warfare. If adversaries were to cut a cable cut or "sniff" into a network, havoc could ...

The post explores the physical layout of North Korea's internet and fiber optic network, based on limited information and assumptions. Key findings include fiber optic connections from ...

To contend with accidental undersea cable breaks and possible sabotage, the United States and allies must expand their repair infrastructure.

For the second time since its installation, the subsea cable that provides high-speed internet and telecommunication service has been severed, ...

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status ...

It was presented by the DPRK to the ICAO on the state of their aviation industry and their ADS-B deployment inside North Korea. However, one slide in particular caught my eye because it ...

Explore North Korea's efforts to develop fiber optic infrastructure, its implications for connectivity, and the challenges of understanding its telecommunications landscape.

Undersea cables serve as valuable but vulnerable assets in a nation's strategic placement in cyber and information warfare. If adversaries were to cut a cable cut ...

This paper addresses how the United States and its allies can more strategically compete with Chinese and Russian threats to subsea cables and reduce the vulnerability of cable ...

We go on a digital hunt to map North Korea's hidden fiber optic backbone using only public clues.

So, some companies are trying to monitor what's going on in the vicinity of any cable - by using fibre optic signals to listen out for surreptitious underwater drones, or hostile vessels...

For the second time since its installation, the subsea cable that provides high-speed internet and telecommunication service has been severed, this time near Oliktok Point.
