

One fiber optic cable and two routers provide network speed

Wondering which to get between Fiber vs. Cable Internet, this post is for you. And, if you have the options, it's OK to get both.

Using two routers typically won't slow down your internet speed if set up correctly. In fact, when configured as access points or extenders, the setup can improve overall performance by ...

Cable Internet Fiber Internet Fiber vs. Cable Internet: The Future Is in The Former Tips on Getting Fiber-Optic Hardware Le Modem (Further) Explained: DOCSIS 3.0 vs. DOCSIS 3.1 vs. DOCSIS 4.0 Tips on Getting A Cable Modem: Which DOCSIS Version to use? Your Real-World Internet (Download) Speeds When you order Fiber Internet, you'll get an ONT. Your provider will install one in your home, generally for free. The ONT is a relatively simple device similar to a network port, though it requires plugging into power. There are generally two ONT speeds--Gigabit and 10Gbps. So, pick the appropriate one for your connection plan--you can use the latte... See more on dongknows .b_imgcap_altitle p strong, .b_imgcap_altitle .b_factrow strong{color:#767676}#b_results
