

Screw: The core component of the extruder. Its design (e.g., length-to-diameter ratio, compression ratio) directly determines plasticization quality and output. It is divided into feed section, compression ...

Our extrusion screws are available in a range of customizable designs, including variations in diameter, length, and material hardness. We offer screws that can be adjusted to suit specific client needs, ...

It is small in size, quiet in operation, and does not require any special maintenance. Mounting to the engine is via a belt transmission. Physically separable from the machine connected by connectors. ...

We provide solutions and equipment for optical glass making, fiber drawing, fiber coating, ribbon making, proof testing and fiber optic cable production. Our technology is used to produce ...

From 2019, we set up India sale service and technology support office: Sokhi extrusion (deals in: Extruder plants, optical fiber cable machine). During these years, We're working hard to sell our ...

From 2019, we set up India sale service and technology support ...

We provide solutions and equipment for optical glass making, fiber drawing, fiber coating, ribbon making, proof testing and fiber optic cable production. Our technology is used to produce telecom preforms, ...

What is a Screw and Barrel for Cable Extrusion? The screw is a helical component that fits tightly inside the barrel. As it rotates, it performs three primary functions: feeding, compression ...

Designed specifically for extrusion of PVC, LSZH, FRLS, XLPE, HDPE, and other thermoplastic materials, our screw barrel ensures consistent melting, mixing, and extrusion, resulting in superior ...

Explore the advancements in extruder screw barrel technology that enhance quality and optimize performance for the extrusion industry.

Our extruders cover all insulation and sheathing applications for wire and cable production.

Optical cable extruder screw
