

## PC-side small busbar

As a leading formed busbar fabricator, we're your go-to custom manufacturer for all your custom copper bus bar needs, from low-volume production to high-volume, low-cost runs.

Compared with copper traces, PCB busbars have a larger thickness and width, so they can withstand a high current and voltage. Besides, a PCB busbar serves as a support structure, as it ...

PowerBusbar PCB are excellent current conductors and enable efficient and low-loss current transport. PowerBusbar PCBs efficiently dissipate heat from the overall system. This prevents hot spots and ...

Lightweight, easy to machine, and corrosion resistant--all with material certificates for traceability. Choose from our selection of bus bars, including over 650 products in a wide range of styles and ...

Mini-PLS busbar system - up to 250 A 40 mm bar centre distance, 3-pole, space-saving plug-and-lock connection from the front, support suitable for top-mounting, all-round contact hazard protection.

A busbar device is a thick, metal conductor that you can directly install on a printed circuit board. This busbar PCB allows you to deal with a great amount of power that cannot be supported ...

Eliminates or reduces the need for heavy (oz) copper layers Opens up areas of the PCB for improved high-speed signal management Can be wave-soldered or bolted into place

Check each product page for other buying options. Price and other details may vary based on product size and color. Need help?

What is a PCB Busbar? A PCB busbar is a conductive element integrated within a PCB design to distribute electrical power or signals within an electrical system efficiently.

Altech has an established line of UL1077/ UL508 Busbars with ratings up to 200A. They are UL recognized and listed for use with most competitor's supplementary protectors and manual motor ...
