

PD optical module

Lasermate's WDM Bi-Directional Optical Modules (BOSA) are compact fiber optic assemblies that integrate a laser diode (LD) transmitter and a photodiode (PD) receiver into a single module.

Optical module usually consists of a transmitter assembly (TOSA, containing a laser LD chip), a receiver assembly (ROSA, containing a photodetector PD chip), a driver circuit, an ...

Boston Applied Technologies, Inc. provides a complete light intensity and polarization management solution for the telecommunications and instrumentation markets, with the revolutionary ...

The Optilab PD-30-M is a 30 GHz photodiode module designed for RF over Fiber, antenna remoting, and broadband RF transmission applications using single mode optical. The PD-30-M can accept ...

Collimator + PD Modules integrate a fiber collimator with a photodetector in a compact assembly, providing precise beam collimation and high-sensitivity detection.

With these capabilities, equipment and systems, we can respond and accommodate many of your Optical Module Assembly needs. We also manufacture and provide housing components including ...

PD Array Module Features Standard 12-pin package Available in 3ch & 8ch configurations Telcordia compliant RoHS compliant

Integrated PD with tap or WDM function provides high performance and reliability in a compact package. The monitoring product family includes advanced modules such as OCM and OTDR, as well as ...

With advanced packaging technology, PD-OPTIC R & D a series of semiconductor LD, applied in EDFA, fiber laser and high precision equipment. Main products are 785nm narrowband laser, 976nm EDFA ...
