

Pinghe Cable Tray Production

Explore the ultimate guide to cable tray production equipment. Learn about types, features, and trends to improve efficiency, precision, and sustainability in manufacturing.

Our advanced cable tray production line is engineered to provide automated forming, punching, and cutting processes for various types of cable trays, including perforated, ladder, and solid-bottom trays.

Explore EAE Electric's medium and heavy-duty cable tray systems designed for optimal cable management and durability in industrial and commercial applications.

Considering the various sizes of cable tray, the roll forming machine is designed in a quick interchangeable type. which can adjust the web and flange sizes automatically.

A modern cable tray production line typically consists of several key components that work in unison to ensure efficiency and quality. The primary stages of the production process include raw material ...

We specialize in the R& D, production, and global supply of cable management systems, including perforated cable trays, cable ladders, wire mesh trays, cable trunking, spraying trays, and strut ...

The whole cable tray production machine adopts PLC control, AC frequency conversion speed regulation technology, to realize automatic continuous production, it is ideal equipment for steel ...

We customize according to customer requirements and meet your semi-automatic or fully automated processing requirements. Please follow us to learn about the structural composition and ...

We are a high-tech enterprise specializing in the research and development, manufacturing, and sales of cable tray production equipment.

According to production needs, cable tray with strip steel width of 100mm \leq \leq 860mm can be rolled. Production speed during online punching: 2.5-5 meters/minute.
