

Price list for DML coherent optical modules for data center interconnection

GIGALIGHT provides 100G, 200G, and 400G pluggable digital coherent optical transceiver modules (DCO) for data center interconnection (DCI), 5G backhaul, metro telecommunication, and other long ...

Marvell offers a portfolio of DCI modules designed to efficiently transmit data over regional fiber networks.

Get the pluggable module performance you need from the manufacturer of choice for all major networking equipment vendors worldwide.

Ekinops optical transport solutions for data center interconnection optimize cost and performance to deploy as much capacity as possible in the minimum space possible using as little power as possible.

Learn how and where to implement Cisco Optics solutions to gain the reach you need for connecting data centers across your metro areas and beyond.

Enhance your network with high-performance coherent optical modules. Featuring tunable DWDM, LC connectors, and data rates up to 400Gbps for long-haul & metro networks.

The solution simplifies transport between data centers by replacing stand-alone optical transponders with the Cisco ® portfolio of standardized coherent pluggable modules, which can be ...

With the development of Internet services, the construction of cloud infrastructure, and the need for AI computing, telecom, and data center operators have put forward clear requirements for the ...

The C-LIGHT CL100GQSFPDW-ZR is a 100G DWDM coherent optical module in the QSFP28 package, designed to meet the high-speed transmission demands of data center interconnect (DCI), metro ...

The 800G ZR+ modules leverage the industry-standard OpenROADM interoperable Probabilistic Constellation Shaping (PCS) mode for high-performance interoperability and reaches extending ...
