

Should cable trays use cable identification tags

If trenches contain only one row of cable tray, it is acceptable to have access to the cable tray from the ground level without the need for an excavated access space along the cable tray path.

The choice of method should be discussed with a local inspector. The best decision may be to extend only the cables, creating a discontinuity in the cable tray.

Labels shall be placed on both side rails where visible on all cable tray segments throughout the plant. Where cable trays contain a barrier with different cable systems on each side the side rail should ...
