

## Standard 380V distribution box

This 60-amp unit provides 380V three phase via a main circuit breaker panel. The power distribution panel provides operators the ability to safely tap into and distribute 380V AC power from a variety of ...

Introducing our Protected Distribution Box (Model YNXM), designed for reliable low-voltage electrical distribution. Rated for 380V/220V and current ranges from 250A to 6A, this distribution box meets the ...

SP-XL low-voltage power distribution cabinet is suitable for three-phase three-wire, three-phase four-wire, three-phase five-wire system of 400V and below, and is used for power lighting distribution.

Durable galvanized sheet steel + PC distribution box with IEC60439-3 standard, rated for 220V-380V, ideal for power distribution in commercial and residential buildings.

PZ30 Plastic Electrical Distribution Box meets standards of GB7251.3 and GB17466. The MCB distribution box has a neutral terminal block, a ground terminal block and a DIN rail, it can be used ...

It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. Designed for power plants, substations, industrial enterprises, and commercial buildings, the ...

Packaging should be the same as what is found in a retail store, unless the item was packaged by the manufacturer in non-retail packaging, such as an unprinted box or plastic bag.

A distribution box rated for 380V can typically operate safely on 400V or 415V supplies, and vice versa, as long as the equipment is designed to IEC standards with appropriate voltage tolerance ...

The distribution box is a small power distribution box that contains power switches and safety devices. The structure is relatively simple, and it is mostly used for terminal power distribution.

Choose from our selection of power distribution boxes in a wide range of styles and sizes. Same and Next Day Delivery.
