

# Support the Global Energy Interconnection

Global Energy Interconnection Development and Cooperation Organization (GEIDCO) is an international organization among willing firms, associations, institutions dedicated to advancing the sustainable ...

We explore the data to see where the clean energy transition stands today, from rising investment and job growth to grid needs and critical mineral demand.

The energy transition requires global scale, open markets and deep interconnection, but geopolitical realities are pushing in the opposite direction, towards regionalization and fragmentation.

Renewable energy generation technologies including onshore wind, offshore wind, wave, tidal, marine current, and ocean thermal energy generation as well as PV power generation, which are considered ...

When fully realised, GEI can dramatically speed up clean energy transitions across regions, while advancing clean energy access and addressing climate change. It can drive new industries, new...

Thus this White Paper aims to highlight the concept of GEI and begin laying the foundations for identifying and addressing the standardization needs for large-scale, transcontinental and global ...

GEI is a global emission reduction plan than can achieve the goals in Paris Agreement. At the. grant the emission paths required for controlling global temperature rise within 2°C. At the national level, GEI ...

The IEA's flagship World Energy Outlook, published every year, is the most authoritative global source of energy analysis and projections. It identifies and explores the biggest trends in energy demand ...
