

West Africa Multimode Bundle Optical Cable

In 2011, Phase3 were building the West Africa One network, an aerial optic fibre transmission system which runs from Nigeria to Benin and Togo.

With small cable diameter, light cable weight, easily to lay. It allows multiple modes of light to propagate through the fiber simultaneously, which can result in lower cost components and easier installation.

This major investment will complete our existing submarine and pan-African terrestrial infrastructures to provide access to international connectivity in a redundant fashion throughout the west coast of Africa.
