

XM-100 Distribution Box

This comprehensive guide delves into the features, benefits, and practical applications of XM Low Voltage Lighting Distribution Boxes, illuminating their role in creating streamlined and ...

This series of products are widely used and can be assembled into control systems with different electrical properties as required such as air conditioning control box, machine tool transmission ...

These circuit breakers are suitable for use in industrial, residential, power distribution applications and communications. Our products meet all essential international and national standards and are ...

The XM series distribution box is a versatile, reliable, and safety-focused solution for modern power distribution needs. Its robust design, modularity, and compliance with international standards make it ...

XM series indoor lighting distribution box is designed for AC 50Hz, 220V or 380V terminal circuits with rated current $\leq 100A$. It provides comprehensive protection against electric leakage, short circuit, and ...

XM series plastic case circuit breaker distribution box (MCCB box for short) is widely used in power plants, substations, factories and mines, hotels, apartments, and high-rise buildings.

It specializes in the production of transmission and distribution products such as complete sets of high and low voltage switchgear, capacitor compensation cabinets, various power control distribution ...

XM power distribution box (hereinafter referred to as metering box) is suitable for use as metering device of AC 50HZ TN-C system (three-phase five-wire) with voltage of 220V.

XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.

They can be assembled into a complete set of distribution boxes as line overload and short circuit protection, and can be used for temporary power distribution.
