

By adopting our technology for stranding and jacketing in tandem, you make your fiber optic cable manufacturing process more efficient. Also, when you combine our stranding unit and yarn server, ...

This document provides specifications for an optical cable sheath production line that can extrude inner and outer sheaths for optical cables using materials like LDPE, MDPE, and HDPE. The line has a ...

One-stop sourcing solutions for fiber optic cables extrusion lines, including loose tube, tight buffer and cable sheathing processes. Features precision temperature control and laser measurement for ...

Its core process involves using an extruder to continuously, uniformly, and densely coat the cable core with molten plastic (such as PE, PVC, LSZH, TPU, etc.), forming the final protective layer.

We provide solutions and equipment for optical glass making, fiber drawing, fiber coating, ribbon making, proof testing and fiber optic cable production. Our technology is used to produce telecom preforms, ...

The invention relates to a sheath extrusion device for an optical cable production line, which comprises a base, wherein a filling mechanism is arranged on the base, an auxiliary...

With our special wire extrusion equipment, you can process micro-coaxial cables as small as 0.025 mm in diameter. A product with these ...

TSD-Z82200 type fiber optic coloring and rewinding machine is mainly used for SM, MM fiber full chromatography coloring, which is convenient for identification of multiple fibers in the beam tube.

Production of indoor optical fiber cables including FTTH, drop, simplex, duplex, distribution, break out and riser optical fiber cables. DTSZ stranding and our ROEX extruder technology are the key for ...

Screw and Barrel: Produced by jinhu Company.

With our special wire extrusion equipment, you can process micro-coaxial cables as small as 0.025 mm in diameter. A product with these properties is mainly used for high-end applications, e.g., in medical ...

Zimbabwe Optical Cable Sheath Extruder
